Synopsis : Doctoral research requires that students generate new knowledge from their research. To do this, they need to understand the trajectory of knowledge development in their area research. This will enable them to map future issues and understand the role of theory synthesis in generating new knowledge.				
Learning outcomes: By the end of the course, students should be able to:				
No.	Course Learning Outcomes	Programme Outcomes	Taxonomy Level	Assessment Methods
1.	Identify current development and issues in technology and management research.	PO1, PO2	C5 CTPS3	ASG
2.	Organize gaps in current research and the role of theory synthesis in theory development	PO4	P4 EM2	ASG
3.	Formulate their research to reflect the most current development in technology and management research.	PO3	A4 CS3	PR, Pr
(ASG = Assignment, T = Test, Pr = Presentation, PR = Project)

TEACHING METHODOLOGY

- Lecture
- Individual and group assignment

WEEKLY SCHEDULE

Week 1	: Fundamentals of Management	Dr. E
Week 2	: Problem Solving	Prof. A
Week 3	: Innovation Management	Dr. C
Week 4	: Lean Manufacturing	Prof. A
Week 5	: Process Management	Prof. A
Week 6	: Basics of financial statement	Dr. F
Week 7	: BEP and cost-benefit analysis,	Dr. F
Week 8	<i>Mid-Semester Break</i>	
Week 9	: Time value of money	Dr. F
Week 10	: Financial ratios	Dr. F
Week 11	: Quality Management	Dr. D
Week 12	: Project Management	Dr. D
Week 13	: Fundamentals of Japanese Management	Prof. B
Week 14	: Project Paper	Self Study
Week 15	: Project Paper	Self Study

Above topics can also be offered in modular form as need arise

ASSESSMENT

No.	Assessment Component	CLO	Weight
1	Assignment 1 (Individual): Critical review of current developments and issues in technology and management research	CLO1	20%
2	Assignment 2 (Group): Research gap analysis and theory synthesis in a selected research stream	CLO2	20%
3	Project Paper (Individual): Research position paper	CLO3	40%
4	Project Presentation (Individual): Oral presentation of the Project Paper	CLO3	20%
	TOTAL		100%

There is no final examination for this course. (ASG = Assignment, PR = Project, Pr = Presentation)

PROJECT PAPER – ASSIGNMENT DESCRIPTION

Task: Each student prepares an individual research position paper of 3,000–4,000 words (excluding references) on the student's own doctoral research area in technology and management. The paper must:

- (i) identify the current developments and key issues in the chosen research area (CLO1);
- (ii) map the gaps in existing research and explain how theory synthesis can address them (CLO2);
- (iii) formulate a research direction for the student's doctoral study that reflects the most current developments, including a preliminary research question and a justification of the proposed approach (CLO3).

Structure: Introduction; Current Developments; Research Gaps and Theory Synthesis; Proposed Research Direction; Conclusion; References.

Requirements: APA (7th ed.) referencing; at least 15 peer-reviewed sources, of which at least 5 are taken from the course reference list; Times New Roman 12 pt, 1.5 line spacing.

Submission: Week 15, as a single PDF file via the e-Learning system. Late submissions are penalised at 5% per day.

Presentation: 15-minute oral presentation followed by 5 minutes of Q&A in Week 15 (Project Presentation, 20%).

Grading: The Project Paper is assessed with a rubric aligned to CLO3 (Taxonomy A4, CS3), covering the review of current developments, the identification of research gaps, the coherence and originality of the proposed research direction, the use of literature, and academic writing.
